1 the kinship group the kinship group is a body of persons who conceive of themselves as sprung from one ancestor and hence as having in their veins one blood it does not matter for our study whether each group has actually sprung from a single ancestor it is highly probable that the contingencies of food supply or of war may have been an original cause for the constitution of the group wholly or in part but this is of no consequence for our purpose the important point is that the members of the group regard themselves as of one stock in some cases the ancestor is believed to have been an animal then we have the so called totem group which is found among north american indians africans and australians and was perhaps the early form of semitic groups in other cases some hero or even some god is named as the ancestor in any case the essential part of the theory remains the same namely that one blood circulates in all the members and hence that the life of each is a part of the common life of the group there are then no degrees of kindred this group it should be noted is not the same as the family for in the family as a rule husband and wife are of different kinship groups and continue their several kinship relations among some peoples marriage ceremonies indeed symbolize the admission of the wife into the husband's kinship and in this case the family becomes a kinship group but this is by no means universally the case
