making a decision of any importance is never simple on the one hand specialists in decision theory do not come within the

reach of most policy makers and secondly there are very few books on pragmatic decision that are not purely anecdotal in addition there is virtually no book that provides a link between decision making and action this book provides a bridge between the latest results in artificial intelligence neurobiology psychology and decision making for action what is the role of intuition or emotion what are the main psychological biases of which we must be wary how can we avoid being manipulated what is the proper use of planning how can we remain rational even if one is not an expert in probabilities perhaps more importantly for managers how does one go from decision to action so many questions fundamental to the practice of decision making are addressed this book dissects all issues that arise almost daily for decision makers at least for major decisions drawing on numerous examples this book answers in plain language and imagery all your questions the final chapter takes the form of a brief reminder everything you have to remember to be a good decision maker

this text written by a philosopher and a social psychologist emphasizes concrete applications of decision research to problems of everyday living as well as to business social and political issues the text contains scores of interesting examples and problems for analysis ranging from personal decisions about medical treatment to truman s decision to use the atomic bomb there is no other text with such a wide ranging coverage with so practical an orientation with such clear descriptions of the steps to effective decision making and with so many end of chapter problems for analysis and practice

should i have this medical treatment or that one is this computer a better buy than that one should i invest in shares or keep my money under the bed we all face a perplexing array of decisions every day thoroughly revised and updated throughout the new edition of straight choices provides an integrative account of the psychology of decision making and shows how psychological research can help us understand our uncertain world straight choices emphasises the relationship between learning and decision making arguing that the best way to understand how and why decisions are made is in the context of the learning and knowledge acquisition which precedes them and the feedback which follows the mechanisms of learning and the structure of environments in which decisions are made are carefully examined to explore their impact on our choices the authors then consider whether we are all constrained to fall prey to cognitive biases or whether with sufficient exposure we

can find optimal decision strategies and improve our decision making featuring three completely new chapters this edition also contains student friendly overviews and recommended readings in each chapter it will be of interest to students and researchers in cognitive psychology behavioral economics and the decision sciences as well as anyone interested in the nature of decision making

researchers studying decision making have traditionally studied the phenomenon in the laboratory with hypothetical decisions that may or may not involve the decision maker's values passions or areas of expertise the assumption is that the findings of these well controlled laboratory studies will shed light on the important decisions people make in their everyday lives this book examines that assumption the volume begins by covering four basic phases of decision making setting or clarifying goals gathering information structuring the decision and making a final choice comprehensive reviews of existing literature on each of these topics is provided next the author examines differences in decision making as a function of several factors not typically discussed in the literature the type of decision being made e.g. legal medical moral and the existence of individual differences in the decision maker developmental differences individual differences in style or temperament differences as a function of expertise the author then examines the topic of group decision making contrasting it with individual decision making the volume concludes with some observations and suggestions for improving people's everyday decision making this book is intended for use as a core textbook or supplement for courses in psychology education or allied disciplines it will also be an invaluable resource for people who work with people making decisions in various applied settings such as schools universities and health care centers

making good decisions quickly is what marks out truly great leaders from the rest of us decision making is one of the most sought after skills today but most of us have never been taught but one most of us have never been taught aged 19 i went off piste snowboarding way before i had the skills or experience to do so and very quickly found myself hurtling towards the edge of a cliff face on sheet ice within minutes i was literally hanging onto a boulder for dear life with my legs dangling over the precipice every single decision i made over the next few hours was life or death there were no easy choices each right
