karl leonhard reinhold 1757 1823 is a complex figure of the late german enlightenment
sometime catholic priest and active mason even when still a cleric in vienna early
disciple of kant and the first to try to reform the critique of reason influential teacher and
prolific author astute commentator on the immediate post kantian scene and at all times
convinced propagandist of the enlightenment in all these roles reinhold reflected his age

but also tested the limits of the values that had inspired it this collection of essays originally presented at an international workshop held in montreal in 2007 conveys this multifaceted figure of reinhold in all its details in the four themes that run across the contributions the historicity of reason the primacy of moral praxis the personalism of religious belief and the transformation of classical metaphysics into phenomenology of mind reinhold is presented as a catalyst of nineteenth century thought but also as one who remained bound to intellectual prejudices that were typical of the enlightenment and for this reason as still the representative of a past age the volume contains the text of two hitherto unpublished masonic speeches by reinhold and a description of recently recovered transcripts of student lecture notes dating to reinhold s early jena period

part of the complete works of the french philosopher historian and social reformer voltaire the first time he writes for the public in prose on political and religious matters for students and scholars of the 18th century enlightenment
