in september 1943 just at the moment when their italian guards were deserting their posts and british prisoners of war were about to be liberated by the advancing allied troops they were ordered by their own officers to stay in their camps this order from the m19 branch of the ministry of defence contradicted churchill s express wishes that all pows should be allowed to walk free fifty thousand allied prisoners missed their chance as german troops recaptured the camps and transported the pows to germany and poland where they would spend the rest of the war this is the diary of one of those fifty thousand lance corporal stan cornwell documents the daily preoccupations of a pow played out against the backdrop of global conflict the diary shows how comradeship enabled men to cope with hardships frustrations anxieties and insecurities and how they and their families were able to hang on to their ordinary lives in extraordinary circumstances of loss deprivation and chaos

long before his momentous teaming with oliver hardy comedian stan laurel 1890 1965 was a motion picture star in his own right from his film debut in nuts in may 1917 through his final solo starring effort should tall men marry 1928 laurel headlined dozens of short comedies for a variety of producers and production companies often

playing characters far removed from the meek dimwitted stanley persona that we know and love this is a film by film look at the pictures stan made as a solo artist as well as those he wrote and directed for other stars shows his development as a movie comedian and filmmaker comedy legend jerry lewis a longtime friend and admirer of stan laurel provides an affectionate and eloquent foreword included are several rare photographs and production stills

robots in groups or colonies can exhibit an enormous variety and richness of behaviors which cannot be observed with singly autonomous systems of course this is analogous to the amazing variety of group animal behaviors which can be observed in nature in recent years more and more investigators have started to study these behaviors the studies range from classifications and taxonomies of behaviors to development of architectures which cause such group activities as flocking or swarming and from emphasis on the role of intelligent agents in such groups to studies of learning and obstacle avoidance there used to be a time when many robotics researchers would question those who were interested in working with teams of robots why are you worried about robotic teams when it s hard enough to just get one to work this issue responds to that question robot colonies provides a new approach to task problem solving that is similar in many ways to distributed computing multiagent robotic teams offer the possibility of spatially distributed parallel and concurrent perception and action a paradigm shift results when using multiple robots providing a different perspective on how to carry out complex tasks new issues such as interagent communications spatial task distribution heterogeneous or homogeneous societies and interference management are now central to achieving coordinated and productive activity within a colony fortunately mobile robot hardware has evolved sufficiently in terms of both cost and robustness to enable these issues to be studied on actual robots and not merely in simulation robot colonies presents a sampling of the research in this field while capturing a reasonable representation of the most important work within this area its objective is not to be a comprehensive survey but rather to stimulate new research by exposing readers to the principles of robot group behaviors architectures and theories robot colonies is an edited volume of peer reviewed original research comprising eight invited contributions by leading researchers this research work has also been published as a special issue of autonomous robots volume 4 number 1

the oath newcentury trilogy 1 stan cooper mi6 s british secret agent arrived at atocha station shortly after a terrorist organization had carried out a bomb attack that left dozens of dead and wounded scattered all over the place he was petrified when he discovered that his mother was among the victims he swore over his mother s dead body that he would find the culprits it was the only way to cope with the pain when he discovered the islamic terrorists he knew that they were a powerful and sophisticated organization led by scientists who had the power to eliminate him he knew that he would face a monster that was almost impossible to defeat he could not expect mi6 to get involved in his personal war he had to face them alone he was only accompanied

by a friend from mi6 everything started to go wrong when the terrorist organization found out that stan cooper had discovered them from that moment on they began a ruthless hunt to kill him now he must fight for his life to fulfill the oath he had made over his mother's dead body

the first full length biography of a brilliant self taught inventor whose innovations in information and energy technology continue to shape our world the economist called stanford r ovshinsky 1922 2012 the edison of our age but this apt comparison doesn t capture the full range of his achievements as an independent self educated inventor ovshinsky not only created many important devices but also made fundamental discoveries in materials science this book offers the first full length biography of a visionary whose energy and information innovations continue to fuel our post industrial economy in the man who saw tomorrow lillian hodderson and peter garrett tell the story of an unconventional genius with no formal education beyond high school who invented among other things the rechargeable nickel metal hydride batteries that have powered everything from portable electronics to hybrid cars a system for mass producing affordable thin film solar panels and rewritable cds and dvds his most important discovery the ovshinsky effect led to a paradigm shift in condensed matter physics and yielded phase change memory which is now enabling new advances in microelectronics a son of the working class who began as a machinist and toolmaker ovshinsky focused his work on finding solutions to urgent social problems and to pursue those goals he founded energy conversion devices a unique research and development lab at the end of his life battered by personal and professional losses ovshinsky nevertheless kept working to combat global warming by making solar energy cheaper than coal another of his many visions of a better tomorrow

the study described in this book arose in the context of a three year collective effort to bring about change in science teaching at mountain elementary school 1 this opportunity emerged after i contacted the school with the idea to help teachers implement student centered science teaching at the same time the teachers collectively had come to realize that their science teaching was not as exciting to children as it could be they had recognized their own teaching as textbook based with little use of the hands on approaches prescribed by the provincial curriculum at this point the teachers and i decided that a joint project would serve our mutual goals they wanted assistance in changing from textbook based approaches to student centered activities i wanted to collect data on learning in student centered knowledge producing

classroom communities i brought to this school my new understandings about classroom communities from several earlier studies conducted in a private high school e.g. Roth Bowen 1995, Roth Roychoudhury 1992. I wanted to help teachers create science learning environments in which children took charge of their learning where children learned from more competent others by participating with them in ongoing activities and teachers were responsible for setting up and maintaining a classroom community rather than for disseminating information. After I had completed the data collection for the present study I watched a documentary about an elementary school in the small French village of Moussac. *Envoyé Spécial* TV5 September 14 1994.

A Life Without End is a fictional portrayal of Stan Miller, a man with a lifelong yearning for an afterlife that began as a child when his beloved pet dog died unexpectedly and he was too young to properly comprehend its death. Despite finding and marrying the woman of his dreams, raising a family and establishing himself as a respected college biology professor, the finality and universality of death continued to haunt him throughout his entire life, triggering an exploration of several major religions, psychotherapy, and finally science, all in quest of somehow eluding death and achieving immortality. Or at least a greatly extended life span. In his early sixties Stan develops a fatal disease, ALS, and despite his wife's many thoughtful reservations ultimately decides to have his body cryonically preserved. Frozen, he is returned to life sixty-one years later in the year 2068 after a cure is found for his disease and discovers a very different world where the altered nature of human relationships are even more difficult to comprehend than the baffling technology surrounding him.
